

I urge you not to attack satellite radio. Leave it the way it is. It's the NAB's fault that they can't give us what satellite radion can give us. I like the instant traffic and weater channels, because I travel all the time, I practically live on the road with the job that I have. I urge you to worry about other laws and petitions that are more important than this silly NAB petitions. LEAVE SATELLITE RADIO ALONE!!!!!!!!!!!!!!
